Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

VOLUME XXIV APRIL, 1917 NUMBER 4

THE AMERICAN MATHEMATICAL MONTHLY

OFFICIAL JOURNAL OF

THE MATHEMATICAL ASSOCIATION OF AMERICA

DEVOTED TO THE INTERESTS OF COLLEGIATE MATHEMATICS

EDITED BY

H. E. SLAUGHT W. H. BUSSEY R. D. CARMICHAEL

WITH THE COÖPERATION OF

R. C. ARCHIBALD	R. P. BAKER	W. C. BRENKE
A. COHEN	B. F. FINKEL	L. C. KARPINSKI
G. H. LING	HELEN A. MERRILL	U. G. MITCHELL
D. A. ROTHROCK	C. S. SLICHTER	D. E. SMITH

PUBLISHED BY THE ASSOCIATION

THE AMERICAN MATHEMATICAL MONTHLY, FOUNDED IN 1894 BY BENJAMIN F. FINKEL, WAS PUBLISHED BY HIM UNTIL 1912. FROM 1912 TO 1916 IT WAS OWNED AND PUBLISHED BY REPRESENTATIVES OF FOURTEEN UNIVERSITIES AND COLLEGES IN THE MIDDLE WEST

ISSUED MONTHLY EXCEPT IN JULY AND AUGUST

LANCASTER, PA., AND CHICAGO

Entered at the Post Office at Lancaster, Pa., as Second Class Matter

CONTENTS

Discussions of Fluxions: From Berkeley to Woodhouse. By FLORIAN CAJORI 145

Note on Some Applications of a Geometrical Transformation to a Certain System of Spheres. By HENRY W. STAGER 154

The Astrolabe. By MARCIA LATHAM 162

A Useful Principle in Curve Tracing. By ARNOLD EMCH 168

BOOK REVIEWS. By G. R. CHATBURN, VIRGIL SNYDER, and W. R. RANSOM 172

PROBLEMS AND SOLUTIONS 176

QUESTIONS AND DISCUSSIONS. Reply by L. A. HOWLAND 188

DISCUSSION by M. O. TRIPP 194

NOTES AND NEWS 195

Summer Sessions of Universities Continued 197

EDITORIAL CORRESPONDENCE should be addressed to the MANAGING EDITOR, H. E. SLAUGHT, 5548 Kenwood Avenue, Chicago, Ill.

BUSINESS CORRESPONDENCE should be addressed to the SECRETARY-TREASURER of the ASSOCIATION, W. D. CAIRNS, 55 East Lorain Street, Oberlin, Ohio.

Synthetic Projective Geometry

By DERRICK NORMAN LEHMER

Associate Professor of Mathematics in the University of California

$0.96

This book is intended to furnish an introduction to the study of synthetic projective geometry which shall be available for elementary students in universities and colleges, and for advanced classes in secondary schools. A knowledge of analytic geometry is not presupposed in the development of the theory.

The book covers a course which can be given to the average class of freshmen in three hours a week through one semester. The subjects treated include correspondences; point-rows and pencils of the first and second order; Pascal's and Brianchon's theorems with their many consequences; duality, poles and polars; involution, besides metrical developments. The book closes with a chapter on the history of the subject. The author has a strong faith in the cultural value of such a course in pure geometry, and has tried to emphasize throughout the unity and symmetry underlying the subject.
